I do not approve of the current proposed Final Judgement in the case of United States vs. Microsoft. In particular, the proposed Final Judgement does not provide enough protection for Microsoft-compatible operating systems, nor does it force Microsoft to open up their file formats, which is a key tool they've used to maintain their monopolies. I endorse the recommendations put forth in Dan Kegel's open letter to the DOJ, to be found at

<http://www.kegel.com/remedy/letter.html>

Thank you for your time.
